

Basic - Bible

Our actions flow out of our belief

If we believe there is a God who created the universe, that God loves us and God wrote a book for us, we should want to read it.

Why read the Bible?

1) It is reliable

-In our world of chaos of ideas we need a solid foundation

-no archaeological evidence has been found that contradicts the Bible (found evidence of Hittites in 18th century)

-we have more and older manuscripts than any other ancient books

-the Bible has proved true and impact in individuals lives for 2000 years

2 Timothy 3:16-17

2) The Bible is God's word

-God didn't dictate every word but led men to write exactly what he wanted them to write using their own perspective and style (1 Peter 1:21)

3) The Bible is useful for all the things we face in life

*The creator of the universe wrote you an instruction manual for life

-Simply read the Bible. It's going to be hard to understand at first but that's ok.
